

Window / Dockers / Contour or **Ctrl +F9**

Contour Docker

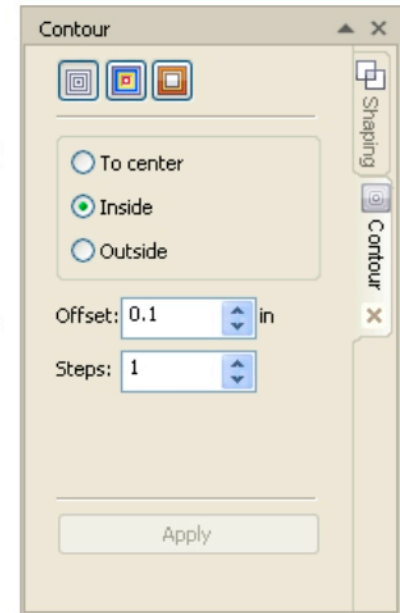

With your text selected:

- Change the Contour Direction to Outside
- Change the steps to 2
- Change the offset to the size you want each Contour.

Contours simulate the look of Outlines yet actually create a new object either larger or smaller than the original object depending on the offset number.

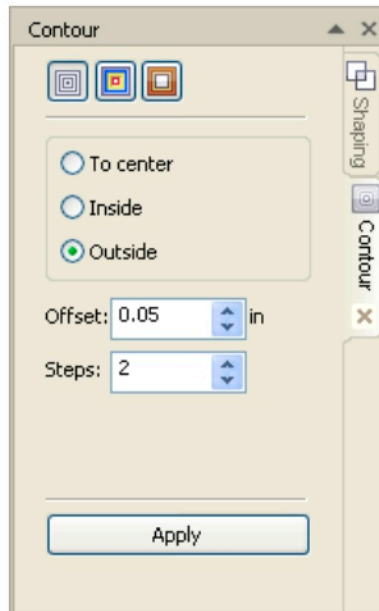

Play with the offset number until you get the desired size and hit apply.

Font style = Aachen BT

**CONTOURED TEXT

With your Contoured object selected, break apart the Contour.

Arrange / Break Apart or **Ctrl+K**

This will give you three (3) objects on top of each other.

CONTOURED TEXT SIMULATING DOUBLE OUTLINE CONTOURED TEXT SIMULATING DOUBLE OUTLINE CONTOURED TEXT SIMULATING DOUBLE OUTLINE

To mimic the double outline fonts;
Select the three (3) objects and Combine them.

Arrange / Combine or **Ctrl + L**
